

Sodium Light

by 404 Guild & 404 Guild

Verse 1: Eliot

Getting bad news in slow motion
Burnt out, the sun hits
Can't believe the timing of this
Can't get with it here, don't want it
It's way too real, if I'm honest
So please, can you just drop it
Too tired to drop logic
I sell the storm, I can't stop it
But I spent so long on my own
Waitin' by the phone
Part of me wants to know
But I just can't let go
Anyway, you never get out the boat
False hope, horizons glow
Sodium light, wet road
There's no good in wondering
So don't go on wondering
There's ghosts along the cliffs
And in the hills and the low wisps in the marsh mist
There's no good in these dreams of yours
The world ain't that beautiful
And the phone that rings, don't take the call
The fires that burn are waiting for

Chorus: Devenny

Wait
We just smile high
What lies beyond
The faded white line
Too scared to push fate
Plus we were in the night
What is outside?
It's warm by this light
Let's stay a bit

Verse 2: Devenny

Lay low
Couldn't face my lows
They called, where was I though?
I resided in the covers of my silo
And I stepped back in a black hole
The night burns bright with my woes
Consumed by the drugs that I let go
Paranoid skittish in the end zone
Panicked in a state but this man though

Had to question that I still have in me
Inquisitive once, now I envy
The youth that inspired me plenty
Being worried 'bout my health since twenty
Had to push my thoughts, they're plenty
I was skirt 'round the bend with my hair free
Just to feel something new in this routine
I can't take all this noise in this room please
Can we quiet it down, it's unlikely
So I pedal my bike to the oak tree
Had a call to the cause but I frenzied
Couldn't handle it's bellow and it scared me
But my soul said wait, you could be free
Take a chance on the mission that you do need
Take a chance on the mission that you do need
Said, said you can

Chorus: Devenny

Wait

We just your smile high
What lies beyond
The faded white line
Too scared to push fate
Plus we were in the night
What is outside?
It's warm by this light
Let's stay a bit, wait

Verse 3: Sonny

Yeah, until now I thought why bother if I'm just passing through?
Yeah, give me something I can put my heart into
Yeah, that night, it was a harvest moon
It was deep and dark and blue
I thought I saw seen it all until I met you
Yeah, it's not love it was something to do
And so I just left, I've got nothing to lose
Everybody's making a hullabaloo
Bad timing, not in the mood
Took another detour, not on the route
Yeah, I'm not proud but I'd do it again
Back to start, where we all go in the end
Let go of your past, when you said I couldn't pretend
You know me but we started to blend, yeah
Same old story, had a hell of a run
Make my mind up for me
Gave up before I begun, yeah
Close my blinds, try to hide from the sun
