

# The Evening Star

by 404 Guild

Verse 1: Sonny

It's just me and my friends  
Yeah, and we saw  
Cobwebs on the payphone  
Black dogs on the way home  
We know the way there, but they don't  
I whisper something in my radio  
I said, "Anyone out there?"  
I two-step in my raincoat  
We keep off of the main road  
Off of the radar, we lay low  
Out here I feel seasick  
It looked calm on the surface  
But you never know what's beneath it  
You want it, but know you don't need it  
But you've got to see for yourself to believe it  
And if I get back on to dry land  
I swear to God I won't leave it

Pre-Chorus: Sonny

And as above, so below  
If you love it, let it go  
Will it last? You never know  
Plant a seed, let it grow  
As above, so below  
If you love it, let it go  
Will it last? You never know  
Plant a seed, let it grow

Chorus: Devenny

Go back and compare things  
Go back and compare things  
I feel it inside me  
I feel it inside us  
Go back and compare things  
Go back, I go back and compare things  
I feel it inside me  
I feel it inside us

Verse 2: Devenny

A new personality shows  
I've shed all my skin and I've grown  
Cleansing myself of the old  
I welcome in light when it's known  
These setbacks are all I have known

Battle my conscience with liquid unknown  
It's bitter, it makes me feel ill  
I feel so sick I could squeal  
I wipe my mouth point at the map  
The others they groan and they clap  
They say the direction is wrong  
Shit, I go by back  
Yeah, never go back  
I'm looking at mirrors, these mirrors talk back  
I'm telling myself that I'm moving on track  
I'm telling myself that I'm moving on track

Chorus: Devenny  
Go back and compare things  
Go back, I go back and compare things  
I feel it inside me  
I feel it inside us  
Go back and compare things  
Go back, I go back and compare things  
I feel it inside me  
I feel it inside us
